Sustainable Coalescence

**A SOCIO-ECONOMIC
ODYSSEY**

**DATE: 6TH AND 7TH
OCTOBER, 2023**

FEEDBACK OF OUR PAST AUDIENCE

"The debate was well-organised and the participants were well aware. You people reminded me of the smart youth our country is famous for"

- Madhur Bhandarkar

"Way beyond my expectations. Never expected a technical college to hold such a non-technical Debate!"

-Dolly Thakore

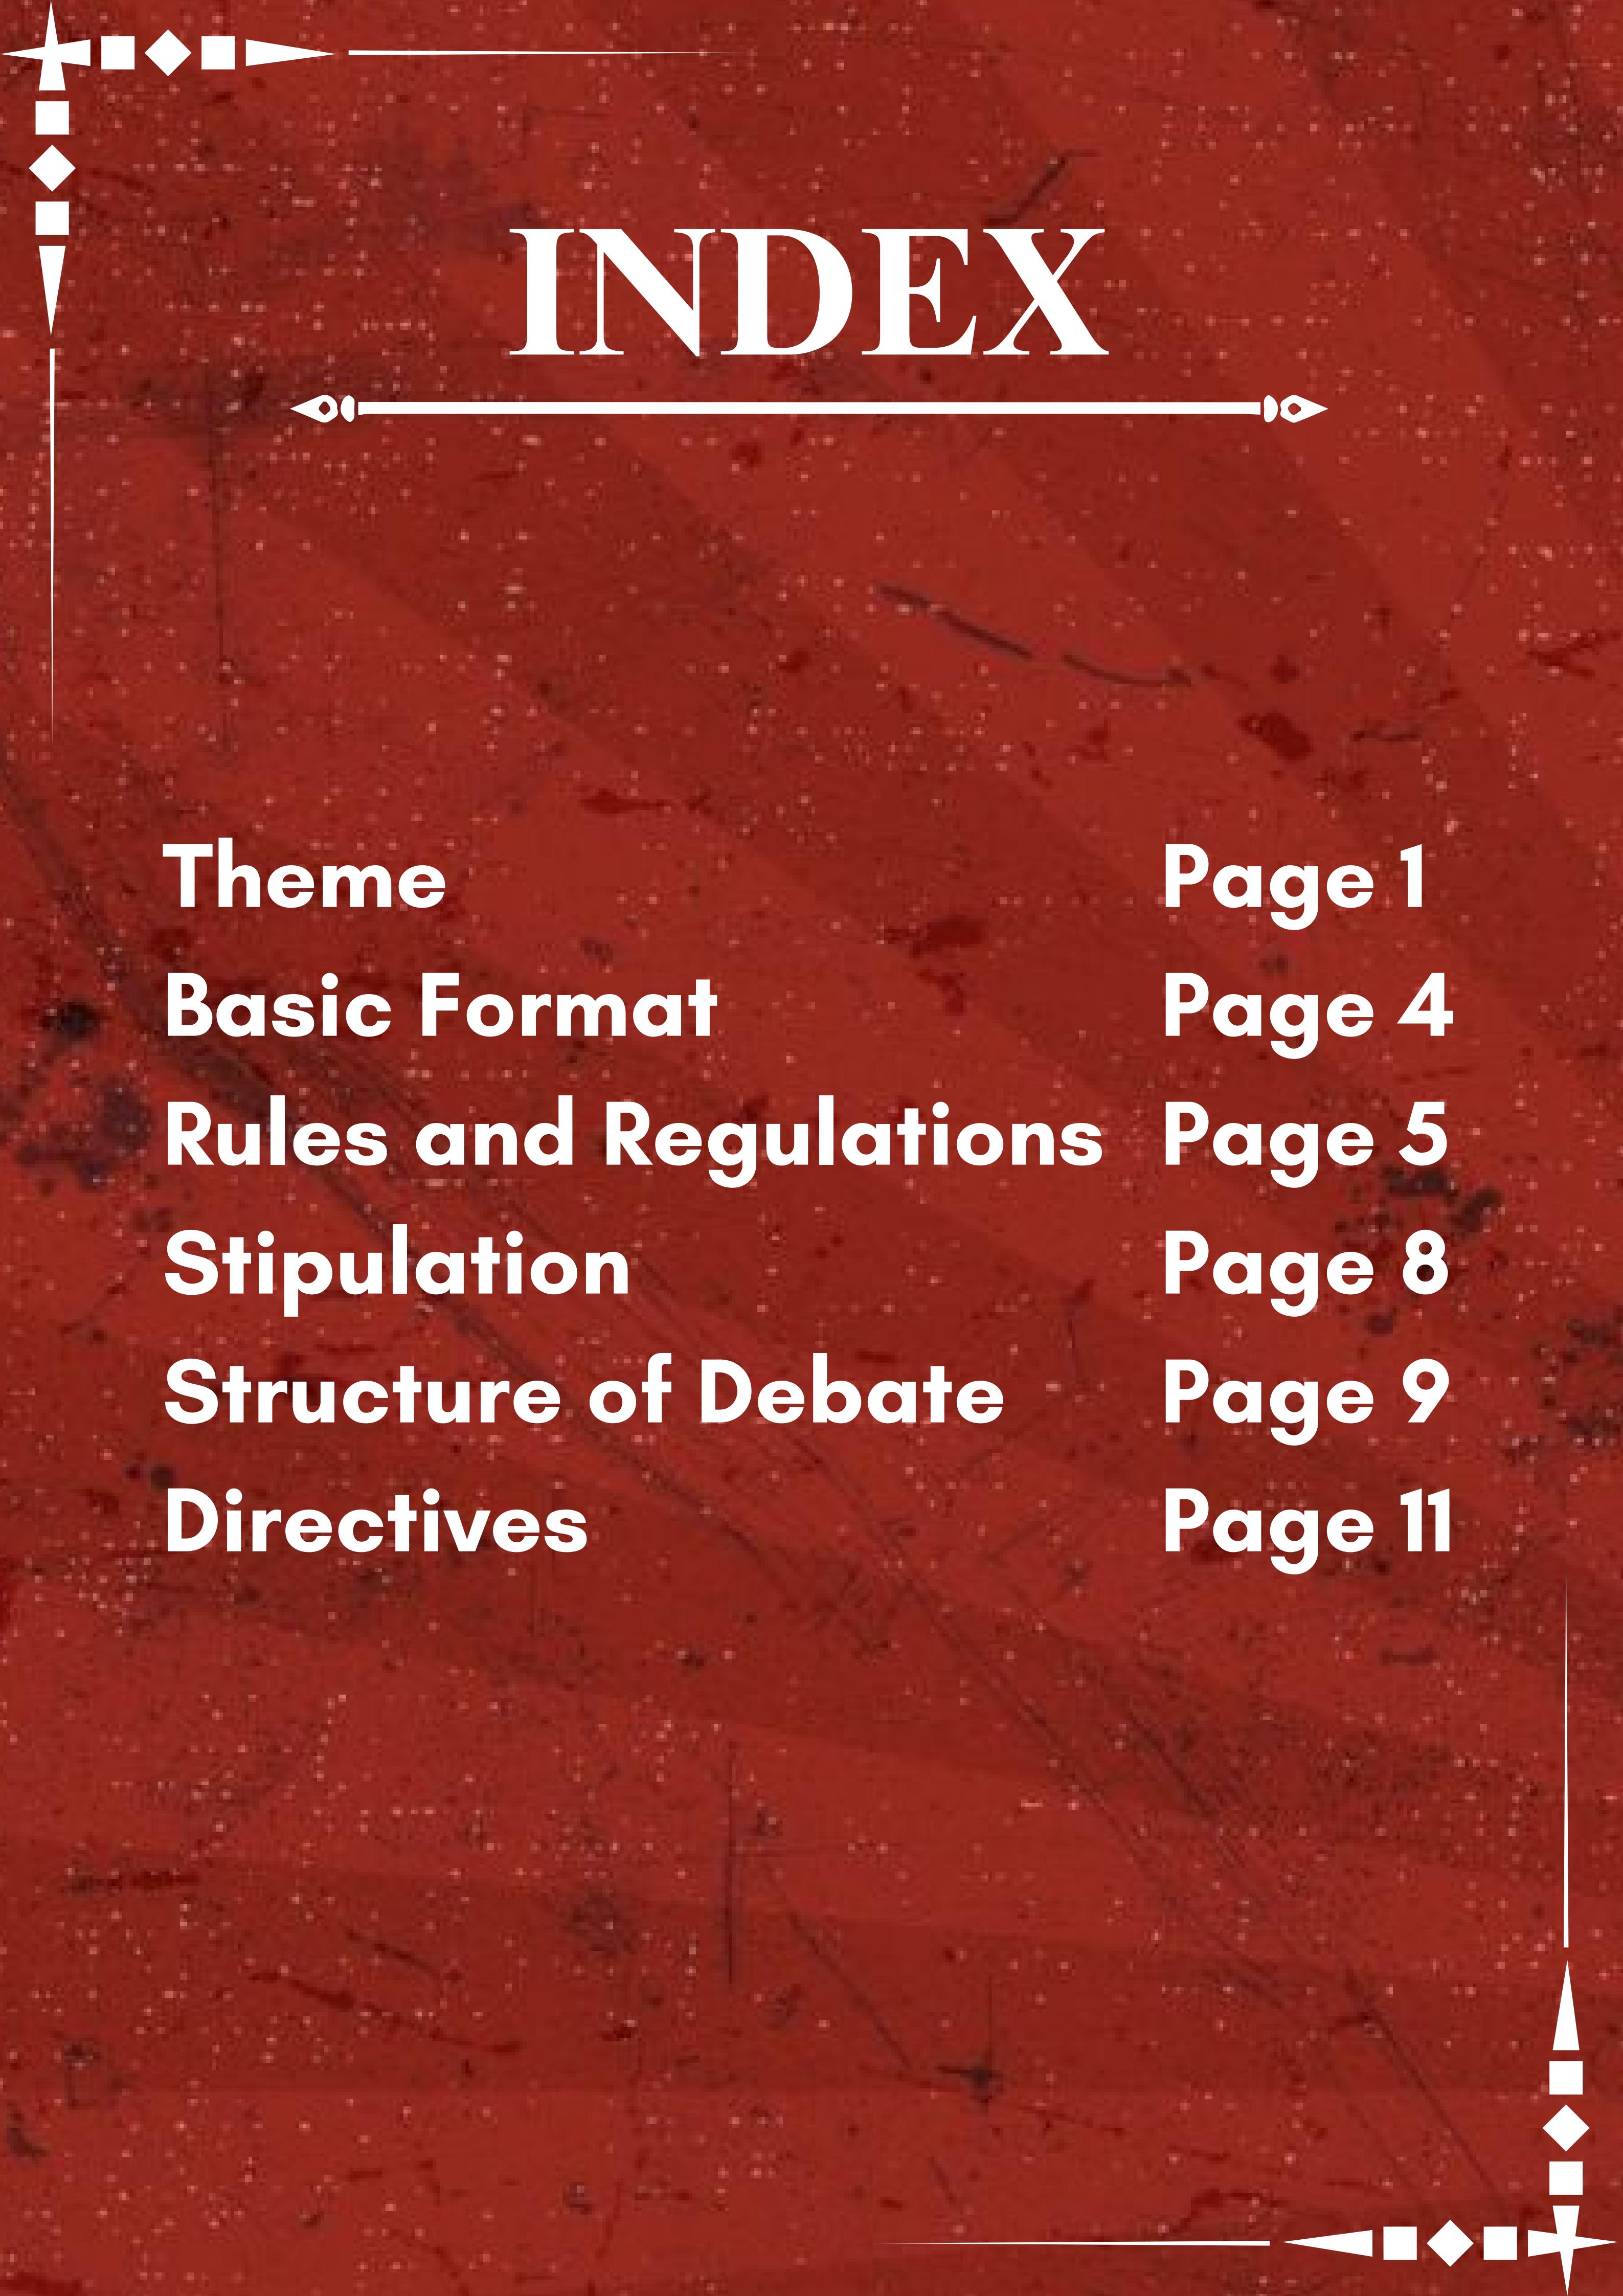

"No wonder films don't always do well. After seeing a debate like this where so many intellectual young minds fight it out who would want to go to a movie theatre?"

-Mahesh Bhatt

ABOUT US

The National level Fr. Conceicao Rodrigues Memorial Debate is a prestigious Debate Competition in Mumbai, hosted annually by Fr. Conceicao Rodrigues College of Engineering, Bandra. Inaugurated in the year 1999 as a debate competition for colleges within Mumbai, it became a National level Competition in 2012. This year, we celebrate the 25th year of this esteemed competition. It is a 2 day event held on 6th and 7th October, 2023 organised by our Students' Council. The debate aims to provide a forum for today's youth to articulate views and engage in a dialogue on various issues.

THEME

The concept of Sustainable Coalescence encompasses challenges tied to consumerism, environmental sustainability, globalization, and economic policies. Consumerism's pursuit of happiness through possession leads to environmental harm, necessitating responsible consumption. Globalization offers opportunities but threatens cultural diversity, urging a balance between cross-cultural exchange and heritage preservation. Effective economic policies should promote growth, employment, and social welfare while prioritizing environmental protection.

Achieving Sustainable Coalescence requires collective action to harmonize progress with environmental stewardship, preserve diverse cultures, and create policies that foster prosperity and sustainability, paving the way for a more equitable and harmonious future. Proposed solutions span systemic changes, altered values, higher taxes on harmful products, and inclusive economic measures. Through such endeavors, society can shape a future where human progress is achieved alongside environmental preservation, striking a balance between global interconnectedness and the uniqueness of individual cultures.
